

The Expert

Design a power point to show what you've learned from your reading.

Sequence each idea so that it makes sense to others and add supporting detail and images to sound more like an expert.

Present your power point to the class.

Learning Log

Keep a learning log for a week.

Each day record something you've read and what you've learned from your reading.

Add sketches, diagrams, tables or other organisers to present your entries in different ways.
